

HCL BigFix SaaS Remediate

A Cloud-Native Automated Vulnerability Remediation Platform

HCL BigFix SaaS Remediate empowers IT and security teams to eliminate critical vulnerabilities with speed and precision. Our cloud-native platform translates real-world threat intelligence into automated action, enabling you to slash your attack surface and prove compliance, all without the cost and complexity of on-premise infrastructure.

Key Features

Automate Remediation at Scale

Apply **500,000+ tested Fixlets** for **100+ OS** and **500+ apps** from a single platform to accelerate patch cycles.

Prioritize with CyberFOCUS™ Analytics

Fix the riskiest vulnerabilities first using real-world threat data from **MITRE APTs** and **CISA KEV**.

Track with Protection Level Agreements

PLAs help measure remediation performance against predefined goals, ensuring alignment across IT, security, and leadership.

Deploy with Prescriptive Guidance

It helps to focus on the highest-risk areas and provides clear, actionable recommendations on what to fix first.

Customize Workflows

Address zero-days with **scripts, registry edits, and configurations** even before vendor patches arrive.

Integrated Vulnerability Remediation (IVR)

Convert scanner findings (e.g., **Tenable**) into automated, executable actions for faster closure.

Capabilities

Accelerate Remediation	Collaborate Across Silos	Consolidate Tools & Effort
Cloud-native: No infrastructure required.	Shared Dashboards: Unify IT and Security team with a single view of risk and progress.	One Unified Platform: Replace scripts, manual trackers, and multiple patching tools.
Onboard in Minutes: Start fixing vulnerabilities on day one.	CyberFOCUS™ Analytics: Prioritize with real-world exploit data from CISA and MITRE.	Built-in Intelligence: Automate remediation, compliance, and reporting.
500,000+ Fixlets: Access the industry's largest library of pre-built, pretested remediation content.	Protection Level Agreements: Track performance, build accountability, and prove compliance.	Manage Everything: Handle endpoints across on-prem, cloud, or hybrid environments — from one console.

Benefits

Stay Ahead of Threats by Fixing the Most Critical Ones First	Align Security & IT, Without the Mess of Too Many Tools	Cloud-Native Speed. Rapid ROI
<p>With smart insights from CyberFOCUS™, you can quickly reduce risk by focusing on the vulnerabilities that matter most — across 100+ operating systems and 500+ popular apps.</p> <p>Stop threats before they become problems.</p>	<p>HCL BigFix SaaS Remediate unites everything in one platform —vulnerability insights, automated patching, and shared workflows —so your teams can work better together.</p> <p>Bring security and IT teams together.</p>	<p>HCL BigFix SaaS Remediate delivers instant scale, automatic content updates, and faster time-to-value —cutting remediation delays and IT effort while delivering measurable risk reduction.</p> <p>Deploy in minutes, no infrastructure needed.</p>
