

HCL UnO+

The unified layer for governed, intelligent execution.

Transform your organization with HCL UnO+, the ultimate execution layer designed specifically for AI-driven enterprises. Serving as a single, centralized hub, it unifies your people, AI agents, and existing systems into one governed and adaptive execution engine.

HCL UnO+ works by fixing your foundational operational layer—seamlessly connecting disparate technologies, optimizing critical workflows, and deploying intelligent AI agents. With total visibility and absolute control at your fingertips, you are empowered to effortlessly optimize your infrastructure and tech delivery while streamlining your entire enterprise value chain.

Key Features

Unified Execution Layer

Orchestrate people, processes, systems, and AI agents across your enterprise to ensure complete visibility and organizational control.

Create Workflows in Minutes

Instantly build workflows using simple prompts, or select and customize existing templates to fit your exact business needs.

Build and Integrate AI

Seamlessly incorporate third-party AI agents or build native UnO AI agents while maintaining strict compliance with your enterprise framework.

Single Point of Control

Gain a comprehensive, real-time view of your organization with HCL UnO+, empowering you to observe and govern from one centralized plane.

Intelligent Observability

Leverage AI to continuously analyze your systems, providing you with actionable, intelligent suggestions to enhance business efficiency.

Self-Healing Capabilities

Embedded AI detects and resolves operational issues autonomously, ensuring your systems remain "always on" without manual intervention.

Business Outcomes

Operation Efficiency	Financial impact	Agility, governance and security
<p>Accelerate Operations Reduce system failures, speed up issue resolution, and decrease your reliance on manual automation management.</p> <p>Complete Visibility of execution statuses, system failures, and associated operational costs.</p>	<p>Lower Expenses rive significant reductions in operational costs across your people, platforms, and daily processes.</p> <p>Tool Consolidation Replace multiple, disjointed automation tools with a single platform to slash licensing and maintenance fees.</p>	<p>Future-Proof Adaptability Seamlessly adopt cloud, AI, and agentic workflows without the need for disruptive or costly system rebuilds.</p> <p>Total Transparency Maintain strict compliance with full auditability and traceability across all automated and agentic actions enterprise-wide.</p>

Proactive Focus

Empower your teams to shift away from reactive troubleshooting and focus on delivering strategic business outcomes.

Measurable ROI

Ensure your automation investments yield clear, quantifiable results that are easily defensible to executive leadership.

Secure Deployment

Deploy confidently across any infrastructure, including sovereign clouds and air-gapped environments, without compromising capability.

Benefits

Reduce Operational Costs Through Intelligent Automation

By replacing fragmented, manual interventions with an autonomous execution engine, you eliminate the high financial drain of resource-heavy troubleshooting. Resolving issues instantly with AI agents fundamentally lowers your overall cost-to-serve and directly prevents revenue leakage associated with downtime.

Drive down costs without compromising performance.

Accelerate Innovation by Reclaiming Talent

When your best engineers are bogged down by repetitive system management, your product and service pipelines stall. Offloading the daily operational grind to HCL UnO+ redirects your most expensive human capital into R&D, dramatically accelerating your time-to-market for new initiatives.

Turn operational bandwidth into competitive advantage.

Scale Seamlessly with Governed Predictability

Business growth is often bottlenecked by inconsistent processes and the hidden costs of human error. By centralizing operations through one governed hub, you ensure every action and workflow is executed flawlessly the first time, providing a risk-free foundation for rapid enterprise expansion.

Deliver perfect execution, no matter the scale.

Real Business Impact

100%

business reliability

60%

faster business processing

45%

business agility

40%

reduction in TCO

**Without orchestration,
AI remains fragmented.**

**With HCL UnO+,
it becomes execution.**
